Amazon Punch Link

CM Blog Post

Tools & Supplies: Cardstock
Base Paper, Paper Scraps, 8x8
Line It Up Template, Clips

Collection Shown: Painted Garden, Dark Green Cardstock, Rock Fern Punch (Amazon Link above)

TEMPLATE MEASUREMENTS

CIRCLE

For inside the template, use the #3 Circle on inside track with Blue Blade.

For outside the template, use the #3 Circle on inside track with the Green Blade.

Using the Red Blade is also an option but it will take up a bit more space.

RECTANGLES

Small Rectangles: 2-3/4" x 1-5/8" (if 1-5/8" is a hard measurement for you, 1-3/4" will work).

Skinny Rectangle: 7-1/4" x 5/8" (there's room to make these wider if desired)

BUILDING THE LAYOUT

1. Determine where you'd like the template to sit on the layout – consider all 4 orientations. It can be top, bottom, middle, or sides. If the template is in a corner, 4x6" photos will fit around the sides.
2. Choose which template pieces you'd like to use and cut according to the measurements given.
3. Clip the template to the cardstock to secure while you adhere your pieces in the spots. If you don't have the template, use a ruler to keep things straight.
