

Simple Scrappy – 8/30/24

Simple Page Kit #9 HACKED

Blog Post

Tools & Supplies: 12" Trimmer, 13x13" Cutting Mat, 4 papers

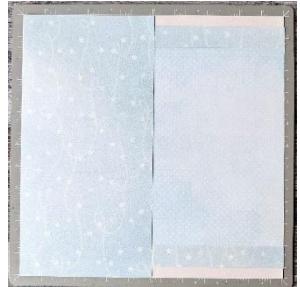

Most of the cut guide in the kit is 4x6" and 4x4" photo mats. You may want to cut two 4x1" strips into tags using different colors of paper/cardstock and a 4x2" journal box if it fits with your layout. I did not use these pieces on my hack. I added a thin strip on the right page, a scrap from the photo mat on the left. I placed my sticker title and journaling directly on the page.

1st Paper: 6x12" vertical strip, (3) 12"x1" horizontal strips, cut one of them in half.

2nd Paper: 6x9" rectangle for the left layout; 12x9" rectangle for the right layout.

***If using a double-sided print, use two sheets. From the 1st, cut the (3) 1" strips, leaving the 9x12" strip (non directional papers are easiest). From the 2nd sheet, cut in half, then cut one of the pieces down to 6x9".

1. Adhere the 12x9" rectangle in the center of the right base paper.
Adhere the 12x1" strips above and below.
2. Adhere the 6x12" strip along the left edge of the left layout.
3. Adhere the 6x9" strip in the center of the right edge of the left layout.
4. Adhere the 6x1" strips above and below the 6x9" piece.
5. If desired, add border stickers or punched borders to the seam of the large and small strips.
6. Cut strips or create a border 1-1/2" wide to adhere down the middle of the left layout. Off center the strip as desired to allow for photo placement.
7. Add additional embellishment.

Left Layout
