Cutting Guide for Double-Sided Paper

#1 & #2: 10"x4"

#3 & #4: 2"x4"

#5 & #6: 6"x4"

Tip: Cut off the 4x12" strip first for the 4x6" mats. Rotate paper and trim off the 2x8" piece to cut in half for the 2x4". That will leave the 10x8" piece to cut in half for 10x4" rectangles.

From the matching prints, cut (2) 10"x11" rectangles and (2) 1-1/2"x11" strips. You'll use the reverse side of one of them.

Tip: Cut a 1" strip off one edge first. Rotate paper & cut off 1/2" then the 1-1/2" strip. That will leave the 10x11"

Adhere the 10x11" pieces centered (1/2" from the top) along the inside edges of the base papers then adhere the reverse side of the 1-1/2" strips to the outside of those.

Adhere the 10" strips 2" down from the top of the base as shown. Adhere the 2" piece alongside the 4x6" mat as shown (flipped to show reverse side).

Punch an edge-style border. Trim to 3/4" and adhere as shown. May also substitute in other desired border element.
